

Neilwinn M. Pineda

3D Modeller | Rendering Production | Visualization Workflows

3D modeller and rendering production specialist with long-term experience in architectural visualization. Used to high-volume work, tight deadlines, scene troubleshooting, client revisions, and building small helpers when repetitive production tasks get too slow.

10+ years in SketchUp, AutoCAD, VRay, Lumion, and Enscape production work

SketchUp**SketchUp**

10+ years

AutoCAD**AutoCAD**

10+ years

VRay**VRay**

10+ years

Lumion**Lumion / Enscape**

Long-term familiarity

Enscape**Adobe Suite**

Experience

Freelance / Independent Work - Web Developer / Automation Developer

2023 - Present

- Built lightweight web pages, tracking tools, and spreadsheet-connected utilities alongside 3D production work.
- Used automation experience to support reporting, monitoring, and repetitive task reduction.

EMAPTA - 3D Modeling Team Leader

Mar 2025 - Mar 2026

- Supported modeling quality, scene cleanup, revisions, and production troubleshooting across active visualization work.
- Helped the team keep outputs consistent while working through tight targets and frequent clarification cycles.

SHORE360 - 3D Modeling / Rendering

Jan 2023 - Mar 2025

- Prepared models and render scenes for production delivery, including cleanup, material checks, scene organization, and output consistency.

Prodigal Developers - Software Development Intern

Sep 2023

- Helped prepare and clean up assets for game-ready use.

Used to production work where small time savings matter. I build tools when repeated manual steps start slowing the team down.

WORK AREAS

VISUALIZATION PRODUCTION

High-volume visualization
production

Production pace

Scene troubleshooting

SKETCHUP AND TOOLING

SketchUp component work

Extension and helper ideas

Long-term 3D toolset

PRODUCTION SUPPORT

Production tracking

Team lead support

Small automation support

Technical Highlights

VISUALIZATION PRODUCTION

High-volume visualization production

Produced and supported large batches
across modeling, rendering setup,
cleanup, revisions, and post-processing.

VISUALIZATION PRODUCTION

Production pace

Used to large batches, fast revisions, and
keeping output consistent under pressure.

VISUALIZATION PRODUCTION

Scene troubleshooting

Comfortable cleaning up messy files,
checking scene issues, and preparing
render setups.

SKETCHUP AND TOOLING

SketchUp component work

Worked with components, groups,
scenes, cleanup, and repeated alteration
work in production files.

SKETCHUP AND TOOLING

Extension and helper ideas

Explored Ruby-based SketchUp helpers
for faster component changes, parametric
workflows, and topology issue checks.

SKETCHUP AND TOOLING

Long-term 3D toolset

Strong long-term use of SketchUp,
AutoCAD, V-Ray, Lumion, Enscape, and
Photoshop-heavy post-processing.
