

Neilwinn M. Pineda

Full Stack Developer | Automation Tools | AI-Assisted Development

Full stack and automation-focused developer with 5+ years of JavaScript experience. I mainly build tools, dashboards, scripts, and web systems that reduce repetitive work, speed up reporting, and make data easier to work with. I started using AI tools early and now use them regularly for debugging, prototyping, and faster iteration.

JavaScript-first developer focused on tools, dashboards, scripts, and practical automation

Experience

Freelance / Independent Work - Web Developer / Automation Developer

2023 - Present

- Developed a custom DTR and attendance tracking system for internal monitoring and reporting.
- Built an inventory management and monitoring system with spreadsheet integration and automated tracking.
- Created responsive landing pages and lightweight web solutions for client and promotional needs.
- Built workflow automation tools and internal utilities using JavaScript, TypeScript, Google Apps Script, and MEAN stack tools.

EMAPTA - 3D Modeling Team Leader

Mar 2025 - Mar 2026

- Built or supported small internal tools for reporting, work distribution, spreadsheet automation, and faster production tracking.
- Focused on practical time savings: faster data lookup, clearer reports, and less manual coordination work.

SHORE360 - 3D Modeling / Rendering

Jan 2023 - Mar 2025

- Used production experience to spot repetitive work patterns that could be improved with scripts, spreadsheets, and small tools.

Prodigal Developers - Software Development Intern

Sep 2023

- Got hands-on exposure to Unity workflows and technical production pipelines.

Used to production work where small time savings matter. I build tools when repeated manual steps start slowing the team down.

CORE TOOLS

- ✦ **JAVASCRIPT**
5+ years
- ✦ **ANGULAR**
4+ years
- ✦ **TYPESCRIPT**
Used with Angular
- ✦ **NODE.JS / EXPRESS**
APIs and backend tooling
- ✦ **MONGODB**
Project database work
- ✦ **GOOGLE APPS SCRIPT**
2 years

WORK AREAS

- 📊 **AUTOMATION AND REPORTING**
Client DOM scraper
Weighted work distributor
Data aggregation and reporting
- 📁 **WEB AND UI TOOLS**
Angular Material UI setup
Landing pages and web clients
JavaScript-first development
- 🔧 **TECHNICAL CROSSOVER**
SketchUp extension work
Personal C++ engine project
AI-assisted development

Technical Highlights

AUTOMATION AND REPORTING

Client DOM scraper

Fetches useful client-side data faster and reduced manual lookup work.

AUTOMATION AND REPORTING

Weighted work distributor

Helped balance assignments and make production tracking easier.

AUTOMATION AND REPORTING

Data aggregation and reporting

Pulled data from multiple sources and turned it into readable reports.

AUTOMATION AND REPORTING

Spreadsheet systems

Built spreadsheet-connected tools for attendance, inventory, reporting, and tracking.

WEB AND UI TOOLS

Angular Material UI setup

Built reusable Material Design pieces to speed up internal tool prototyping.

WEB AND UI TOOLS

Landing pages and web clients

Built responsive landing pages and lightweight websites for client and promotional needs.

Skills

Web Development

JavaScript TypeScript Angular
Ionic React Node.js Express

Data & Automation

DOM scraping Google Apps Script
Excel automation Google Sheets
MongoDB Reporting tools

Internal Tools

Dashboards Work distribution
Data aggregation Browser tooling
Reusable UI Small utilities

Technical Range

C++ personal engine work
C# / Unity familiarity Ruby scripting
SketchUp extension work
Graphics tooling

AI-Assisted Work

Early AI tool adoption Debugging
Prototyping Code iteration
Problem solving Claude / Codex

Education

Gordon College

BS Information Technology - 2017 - 2022

Saint Louis University

BS Architecture, Discontinued - 2013 - 2017
