📌 QUICK NOTE

I usually build from curiosity or workflow friction. Most projects start small, then gradually grow into systems once the patterns become clearer.

✦ RESUME

Neilwinn M. Pineda

3D Modeller • Full Stack Developer • Automation Systems • AI Workflows

I work across 3D visualization, full stack development, automation, and technical workflows — with hands-on production experience spanning rendering pipelines, web systems, internal tooling, and team leadership.

If there's friction in a process, I tend to build something to fix it.

MODELS & RENDERS

📅 Experience

EMAPTA — 3D Modeling Team Leader

Mar 2025 — Mar 2026

Led a 3D modeling production team delivering high-volume architectural visualization for international clients.

Owned workflow coordination, quality standards, and technical troubleshooting across the full production pipeline.

Served as the key liaison between production teams and management during peak-volume periods.

SHORE360 — 3D Modeling / Rendering

Jan 2023 — Mar 2025

Delivered high-volume architectural visualization outputs — modeling, rendering, and post-processing — across tight client turnaround schedules.

Maintained consistent quality across large SketchUp and VRay pipeline batches under sustained production pressure.

Prodigal Developers — Internship

Sep 2023

Contributed to Unity-based workflows covering asset preparation, geometry optimization, and game-ready production pipeline structures.

✦ Technical Highlights

📦 Production 3D Visualization

Delivered thousands of production-ready visual outputs across modeling, rendering, and post-processing pipelines in professional studio environments.

💻 Full Stack Web Development

Built full stack JavaScript systems including dynamic dashboards, REST APIs, browser extensions, and workflow-oriented web applications.

⚡ Workflow Automation

Built custom tools, reporting systems, scraping utilities, and spreadsheet automation targeting real production bottlenecks — reducing repetitive work and improving team visibility.

🔗 AI & LLM Workflows

Integrates LLM tooling into development workflows for faster prototyping, debugging, code generation, and iterative technical problem-solving.

Skills

Programming & Systems

General programming background across high-level scripting, low-level languages, runtime tools, extensions, and modular systems.

General Programming

Systems Programming

Runtime & Tool Development

Modular Architecture

Tools: C++, C#, JavaScript, TypeScript, Python, Ruby

Data & Automation

Experience with structured and unstructured data, automation workflows, scraping, reporting, and data-driven operational tools.

SQL / NoSQL Systems

Workflow Automation

DOM & Web Scraping

Operational Dashboards

Tools: MongoDB, Google Apps Script, Excel, Google Sheets

AI & LLM Workflows

Applies AI and LLM tools to accelerate development — prototyping, debugging, code generation, and iterative problem-solving across projects.

AI-Assisted Development

LLM Workflows

Agentic Tooling

Prompt-Guided Iteration

Tools: Claude, Codex

Full Stack Web Development

Builds full stack web applications, REST APIs, dashboards, and dynamic interfaces across modern JavaScript ecosystems.

Full Stack JavaScript

REST APIs

Dynamic UI Systems

Dashboard Applications

Tools: MEAN / MERN, Angular, React, Node.js, Express

Graphics & Visualization

Strong production background in 3D visualization, rendering, modeling workflows, and final image preparation.

3D Modeling

Rendering

Post Processing

Tools: SketchUp, VRay, AutoCAD, Lumion, Enscape

Custom Tools & Workflow Systems

Builds custom tools around real production needs — repetitive task reduction, QA checks, reporting systems, and workflow coordination.

Internal Tools

Reporting Systems

QA Utilities

Workflow Systems

Tools: Apps Script, Dashboards, Spreadsheets, Utility Scripts

Education

Gordon College

BS Information Technology · 2017 — 2022

Saint Louis University

BS Architecture, Discontinued · 2013 — 2017

I build things that are flexible, visual, and scalable — and I'm looking for a team where that kind of thinking makes a real difference.
